

RTM is a specialist in helping clients to achieve and maintain their compliant management systems, so that they are simple, integrated and effective. I, Robert Meldrum, the Principal, am a freelance certification auditor, trainer, facilitator and consultant with over 25 years' experience in these roles to share with clients. I currently carry out third party certification auditing and training for a number of certification bodies. I also have over 20 years of working in industry as an employee across many roles.

I can help your business with the following:

- Internal auditing support and resourcing
- System integration
- System simplification
- Non-conformance rectification
- Pre-certification "health checks"
- Short awareness/briefing sessions
- Auditor and system administration mentoring
- SWOT analysis
- Supplier/sub-contractor audits
- Problem solving sessions
- 2015 and 2018 Standard upgrades
- 9001, 14001, 45001, 4801, 18001 expertise

Clients:

Some past clients that I have worked with are shown over the page. No business is too big or too small.

Industry Knowledge:

A depth and breadth of experience with compliance standards, compliance management systems and auditing, spanning over three decades. I aim to harness your unique industry knowledge with my proven approach to achieve a simple and effective outcome.

Accredited training:

If you require accredited training I have access to Australia's most popular auditor training programs that can be delivered on-site, followed by live audit activities in your workplace, on your systems.

Maintaining Certification:

Most problems identified by certification audits can be linked to a lack of knowledge of the standard or simple, practical and business-friendly ways to comply with the standard/s and to add true value. I help my clients to understand what the standards require and provide a range of pragmatic solutions to help you meet the requirements. Often clients aren't sure how to address actions arising from certification audits. I will help you understand these issues and identify any corrective actions needed.

My pledge to you:

I can provide my services on a half day or full day rate for either an ongoing arrangement, ad hoc or on a once off basis. If you are not satisfied with my services, I will refund the fees.

Introductory visit:

To help us understand your requirements I offer a no obligation, no charge introductory visit so that I can meet and discuss with you, an approach that would best suit your needs.

'Health Check'

Would you like to try our "Health Check" option as a first time user? I would spend half a day or a day reviewing your system/s and processes from start to finish, and identify any weaknesses or activities in need of improvement or to offer greater value to your business. I would record these findings together with your strong points in a brief audit report. This would provide you with the current health of your management system and a clear picture of the best path forward.
